#### Welcome to exploring the landscape of US veterinary schools!

We have **30 accredited veterinary schools** in the US. Nationwide about **3000 students are admitted** each fall to begin a **four-year curriculum** for a Doctor of Veterinary Medicine degree.

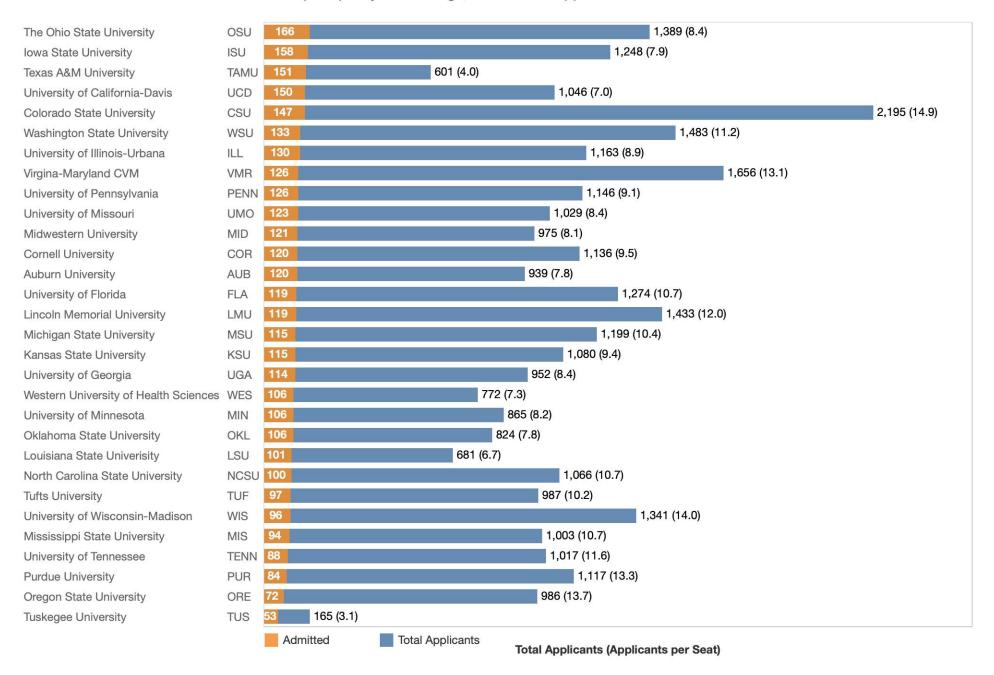

The schools are quite diverse, so it may take some study to find the best match.

Below is a quick introduction by location, total students enrolled and placement in the US News 2019 ranking of the Best Veterinary Schools.

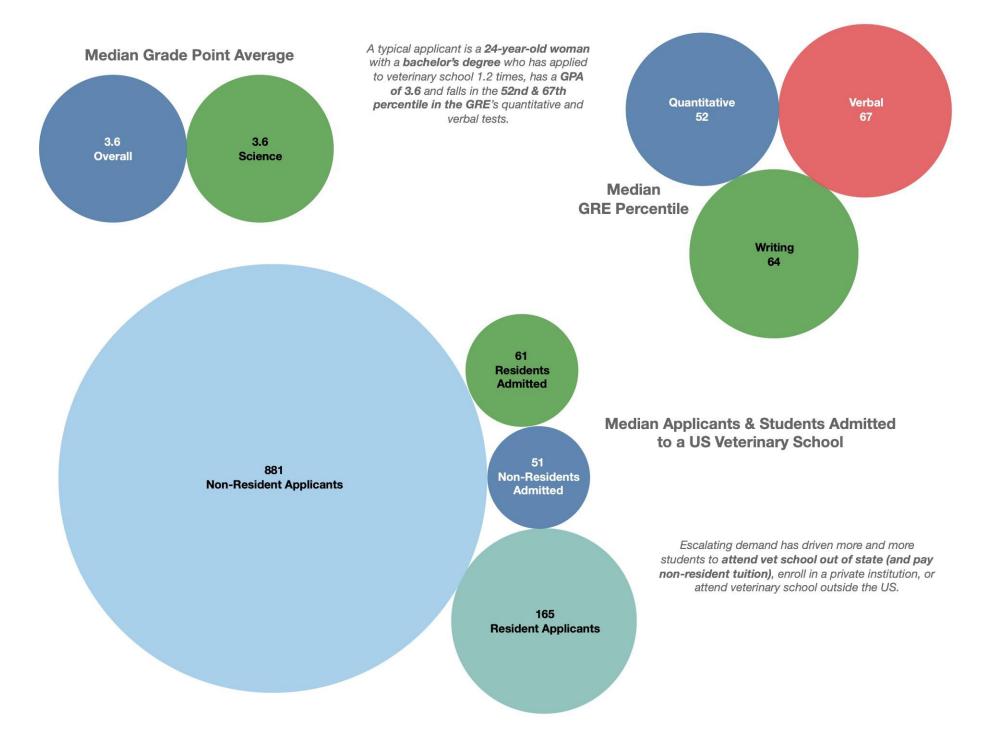

#### Getting into veterinary medical school is not easy.

The Class of 2022 ranges from 53 to 166, with an average of 115 students per school. Demand outstrips capacity! On average, there are 9.5 applicants for each available seat.

#### Veterinary students are a cut above, but might be someone like you!

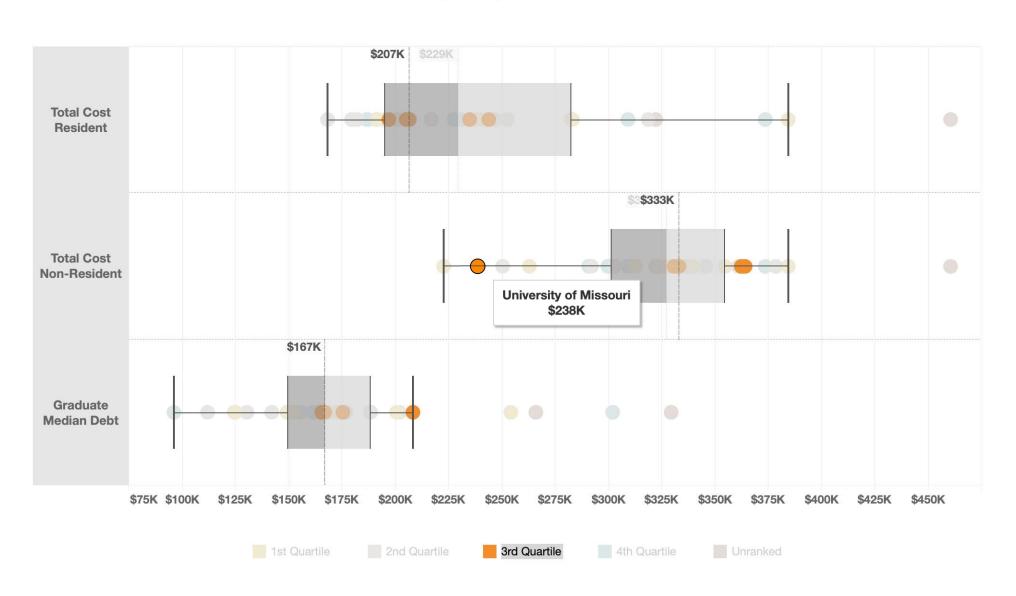

# Unfortunately, veterinary school is quite expensive and it is four additional years of college.

There is a big **difference between resident & non-resident** tuition and fees.

Many students graduate with **substantial debt**.

Costs **vary widely** across the schools.

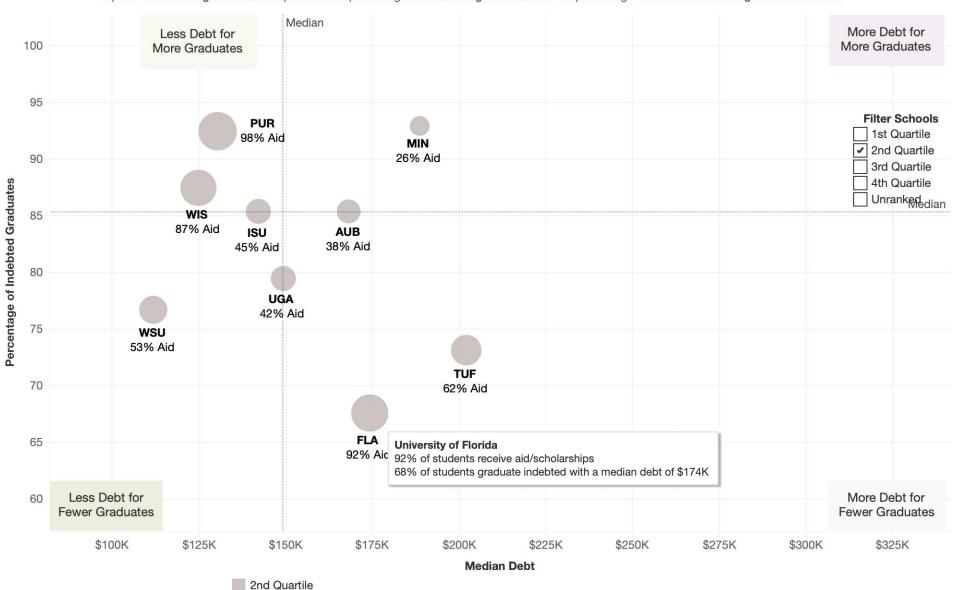

#### The debt burden of graduates is a growing concern.

The institutional aid & scholarships available to help offset costs vary widely.

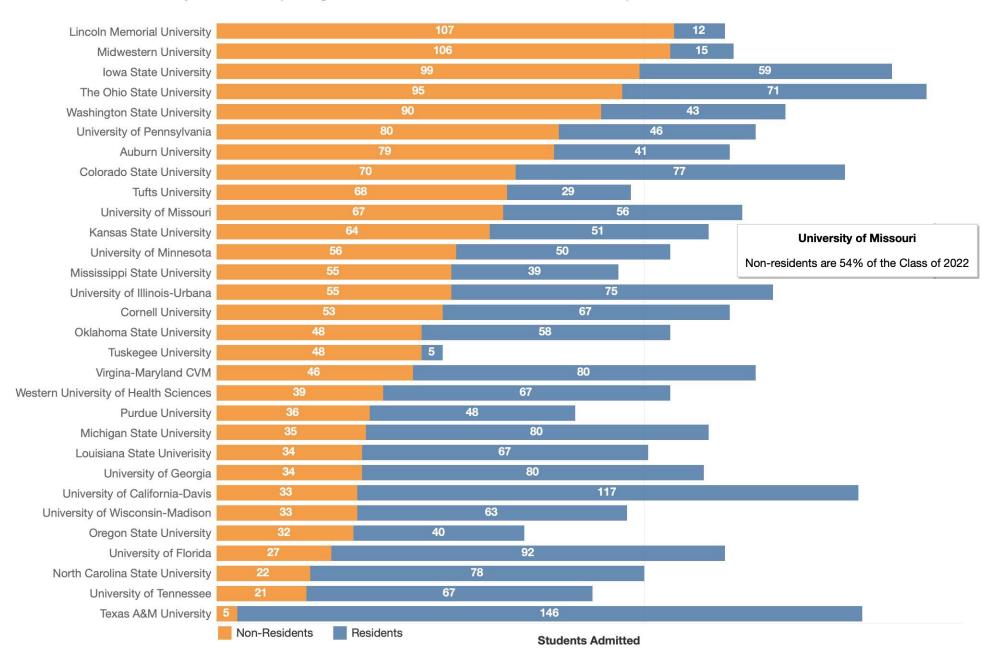

Schools in the lower left quadrant graduate fewer indebted students with less debt.

Explore the debt of graduates compared to the percentage of indebted graduates and the percentage of students receiving institutional aid.

## If your home state is not an option, where are non-residents admitted?

Many schools accept a significant number of non-residents who make up 47% of the Class of 2022.

### **Explore the options for non-residents.**

Available non-resident seats (size of box), the number of applicants competing for each seat, the academic criteria (GPA, GRE) and importantly, the expected four-year costs (red shades are more expensive and greens are less expensive).
